

CLM Remote Controller 1600

Controller for use in conjunction with CLM remote and wall-mounted programmers

Product description

- Only one controller for up to three remote wall programmers
- Allows updating user keys and associated access permissions independently of the administrator's PC
- Contains the database for the created key changes
- Does not need to be near the wall programmer, just on the same local network
- Uses DHCP for automatic IP assignment
- In plastic housing for head rail mounting
- Input voltage range: 24 V DC(+10 %) SELV (e.g. Model 1003 24 V DC)
- maximum current consumption: 400 mA
- Place of use: for indoor use
- Protection class: IP 30 (when fully assembled)
- Operating temperature: 0 °C to +40 °C
- Battery Real Time Clock (RTC): Type CR2032 Lithium button cell 3 V 210 mAh
- Battery life: approx. 5 years - varies depending on the quality of the button cell used
- Ethernet interface: RJ45 transmission rate 100 MBit/s IEEE standard 802.3.-100BASE-TX

Scope of delivery

- 1 Remotecontroller
