

How do I get the registration key code / unlock code?

When installing CLIQ Manager on the computer, you will be shown a registration key. To activate the licence, please go to www.registerserver.com. There you register and immediately receive an activation code. You can now use CLIQ Manager without any restrictions.

If you do not have Internet access at the moment, you can use the software without activation for 30 days and complete the registration within the 30 days.

This process must be repeated if you change computers. From the 4th licence onwards, please give a short reason, you will then receive the activation code from the 4th licence onwards within a maximum of 24h.
