

What license model is recommended for the MS-SQL database?

With reference to the current system requirements, we recommend for the server "Microsoft SQL Server Standard Edition.

1. Minimum:

- 2 SQL User
 - 1x CLIQ Web Manager Application Server
 - 1x CLIQ Web Manager Remote Server

2. Recommended:

- 4 SQL User
 - 1x Service Tool to create the database and perform subsequent CLIQ Web Manager updates (DBO)
 - 1x Read and write access for the CLIQ Web Manager
 - 1x DBO for the creation of the remote database
 - 1x Read and write access for the CLIQ Web Manager Remote Server

Note:

The number of cylinders and keys has no influence on the number of users. This also applies to the remote programming devices, as these only communicate with the CLIQ Web Manager Remote Server.
