

CLIQ Connect PC Installation (ccPC)

You can find the current version of CLIQ Connect (ccPC) on our [Website](#) or directly under cliqconnect.assaabloy.com

Please carry out the installation and follow the instructions.

During the installation process, the settings are then requested:

 The screenshot shows the "Setup - CLIQ Connect 1.7.4" window. The title bar includes the CLIQ logo and window controls. The main content area is titled "External services settings" and asks "Which services should CLIQ Connect have access to?". Below this, there is a section with the instruction "Select ASSA ABLOY's services to integrate with. It is recommended to turn on automatic updates and Directory Service integration." There are three main settings sections: 1. "Enable automatic updates" with a checked checkbox and a green question mark icon. 2. "What CLIQ system(s) are you using?" with two checked checkboxes: "CLIQ Go" and "CLIQ Web Manager (C-key)", each with a green question mark icon. 3. "Enable Directory Service integration" with a checked checkbox and a green question mark icon. Below this, there are two text input fields: "CLIQ Remote URL" with the value "https://remoteserver01.assaabloy.com:443/cliqremc" and "CLIQ Enrolment URL" with the value "https://remoteserver01.assaabloy.com:443/cliqweb". At the bottom, there is a footer with "ASSA ABLOY AB" and three buttons: "< Back", "Next >", and "Cancel".

1. Activate automatic updates
This ensures that CLIQ Connect PC is always up to date.
2. Which CLIQ system(s) do you use?
Depending on which system you use from us, the hooks are to be set individually.
3. Activate directory service integration
Hosting-Customers leave the checkmark activated.
For servers in-house, the checkmark must be removed and the remote address of the remote server must be entered.

Attention:

After installing CLIQ Connect PC, it is automatically stored in the Windows autostart folder and thus starts itself after each Windows restart.

Additional configuration options (if required):

After the installation has been completed, further configurations can be made. To do this, right-click on the CLIQ Connect PC symbol and select "Configuration".

Here you can also set up a proxy server and select the old enrolment method.
