CLIQ® FAQs

How is the migration from CLIQ Manager (CM) to CLIQ Local Manager (CLM) performed (video/film)?

The migration from the old CLIQ Manager (CM) to the CLIQ Local Manager (CLM) is basically quite simple.

We would like to give you a brief overview in this way:

1. Backup for migration (A2B file) must have been created from the last version of CM (3.6.10)

    1. Otherwise, please update the CM
    2. dach.assaabloy.com/de/en/downloadportal/136:484-cliq-software
2. You absolutely need the current desk programming device (depending on the CLIQ system, CP04, NP04 or VP04).

    1. This one for example: VERSO Desk programming device

3. Install CLM

    a. You can get a link from the specialist trade partner
    b. Please ensure that the Windows updates are up to date, i.e. do not initially connect the PC to the Internet for the installation of the CLM, but install the updates beforehand (otherwise problems may occur).
4. Start CLM and
5. A2B migrate
6. Import licence
7. Perform import

    ○ People pictures, building plans (doors), reports from reporting, schedule templates, more than 1 address field for people, open orders are not taken over

Additionally you will find on our youTube channel helpful videos.
