

## How do I update the licence for CLIQ Local Manager?

Why do I need a new licence and how do I activate it?

A new licence is required if your current licence has expired or if you want to unlock additional features.  
A new licence is also required when updating to a new major version (e.g. from 1.x to 2.0).

How to update your licence:

- If the licence has expired simply click on "SELECT" in the message displayed and select the new licence file.

- During operation: go to "Settings" → "General", expand the "Additional settings" area and click on "LICENCE UPDATE". Confirm with "OK", select the new licence file and click on 'Open'.

You will receive the licence file from your CLIQ retail partner. Once the update has been successfully completed, you will receive a confirmation message.
