Virtual tableau
Tablet PCs like an iPad or Android tablet work perfectly as virtual tableaux. The compact structure enables solutions with high demands on design.

Web service of the TSB Controller
The TSBC Web Control Panel is a web service of the 970-TSBC and can be displayed by many web browsers. The latest version of the web browser is required, as well as an activated JavaScript.
As a web service of the 970-TSBC, it is almost independent from the operating system and requires no installation on the display unit.

Clear matrix specification
In a clear matrix arrangement, control elements are used for displaying the door status in colour.
These elements can be operated centrally after the relevant password is entered.
The arrangement and selection of the linked doors can be defined in the FT Manager for each tableau.

Group functions
As an alternative to the doors, group functions of the 970-TSBC can be linked with the control elements, for example to lock all doors once the store has closed.

Optimised for tablets
To enable the TSBC Web Control Panel to be displayed in every position, the size of the control elements is adapted automatically to the screen area.
It is optimised for touch control and can be used on a PC without restrictions.

Licenses
The TSBC web control panel is activated via a licence key per tableau view in the TSB controller. Every tableau view can be displayed on a computer.
Two licences are required for the simultaneous display on two computers. A maximum of 5 tableau views (licences) are possible per TSB controller.
Licences for various tableau sizes are possible.

Size of the Web Control Panel (please mark)	Quantity (max. 5)
☐ **970-WCP-010--00** with max. 10 buttons	_____
☐ **970-WCP-020--00** with max. 20 buttons	_____
☐ **970-WCP-030--00** with max. 30 buttons	_____
☐ **970-WCP-050--00** with max. 50 buttons
