## Braunschweig Hospital with efficient access control from ASSA ABLOY

Modern medical technology, innovative diagnostic and therapeutic procedures, as well as committed and qualified staff ensure high-quality patient care around the clock.

### Characteristics

Object:	Städtisches Klinikum Braunschweig gGmbH, Braunschweig
Branch:	Hospitals and clinics
Employees:	4,000
Capacity:	approx. 1,500 beds
ASSA ABLOY components:	SCALA net access control from the effeff brand on around 160 online doors and 150 Aperio-Offline components, e.g. half cylinder, escape route centres and customer-specific special solutions
ASSA ABLOY partner:	BELL system Bernd Ell, Gerhardshofen

### Challenge

With 1,475 full inpatient hospital beds and 24 semi-inpatient hospital beds and 4,274 employees in the hospital (almost 5,000 incl. subsidiaries), Braunschweig hospital is one of the largest employers in the region. As a university-level hospital, it serves the Braunschweig region with around 1.2 million inhabitants. With 21 clinics, 10 independent clinical departments and 7 institutes, almost the entire field of

medicine is covered. More than 65,000 patients are hospitalised and around 200,000 outpatients are treated every year.

An efficient access control system was sought for the newly built approximately 7,000 sqm administration building at the Salzdahlumer Straße site, which houses, among other things, the centre for paediatric and youth medicine.

### Solution

After considering and assessing the requirements, the hospital decided on the effeff SCALA net access control solution, which was installed by ASSA ABLOY partner BELL System. SCALA is a flexible system that grows with customers' needs.

enables a system structure integrated into a network and offers the full range of functions of an access control solution, such as the configuration of doors, groups or schedules. In this way, the structure grows with the needs of the hospital and also fulfils special requirements.

The system can be extended almost as much as required and adapts continuously. SCALA net

The optimal solution is a combination of products from the ASSA ABLOY and effeff brands:
