vintage cars and caravans at
parkNsafe

ASSA ABLOY

Experience a safer
and more open world

The optimal solution
is an IKON brand
product.

Project reference: eCLIQ locking system protects vintage cars and caravans at parkNsafe

"With 99 tenants, access to sanitary facilities and a warehouse for vintage cars, an electronic locking system is a perfect solution. Our contact person K&K-Beschläge Heilbronn has also taken over the complete programming and installation. Very good service!" Jörg Nusser, owner of parkNsafe, Winnenden.

Characteristics

Premises:	parkNsafe, Winnenden
Area:	Traffic
Capacity:	58 garages and 41 parking spaces
ASSA ABLOY components:	eCLIQ master key system from the IKON brand
ASSA ABLOY partner:	K&K-Beschläge Heilbronn

Challenge

ParkNsafe provides secure and modern parking facilities for vintage cars and caravans. The entire system is illuminated, fenced and permanently alarmed with video surveillance. The almost 100 vehicle owners and parking space renters have free access to the premises

around the clock. This means that a locking system is required, which offers uncomplicated management of access authorisations. In order to protect valuable vehicles, the system must also offer a high level of protection against tampering and intelligent attacks.

Solution

Jörg Nusser, owner of parkNsafe, chose the digital eCLIQ locking system from ASSA ABLOY, "because the keys are visually appealing, programming is simple and the profile cylinders do not have batteries that need to be replaced." The decisive factor, however, was that the solution offers state-of-the-art control with total flexibility. Access authorisations can be changed

quickly and easily with eCLIQ from the IKON brand, for example, which is essential due to the constantly changing renters. Lost keys can also be deactivated immediately. Management is carried out via the CLIQ® Web Manager, an easy-to-scale and very user-friendly software.
