and more open world

Cover profile FSA 8800 [S]
The hinge-side cover profiles for almost all doors with roller hinges

Few components – quickly assembled

Even simpler – even more ingenious: The well-known finger protection program is being expanded with new hinge-side cover profiles with innovative fastening technology. This enables installation without time-consuming screw fittings and specific expertise, with a minimum of time required and a high degree of cost efficiency.

Dismantling, for example if work is required on the door element, is possible without tools. The cover profile is suitable for almost all applications and special cases, which makes planning extremely simple and convenient. To determine the appropriate model, only the diameter of the roller hinges is required.

The advantages at a glance:

- Simple installation in just a few minutes enables efficient on-site use
- No screw connections necessary on the door element and therefore perfect suitability for fire doors
- Maximum coverage of applications for lower storage costs
- System solution for almost all doors

Planet
ASSA ABLOY

# 1,2,3, - done!
Enormous time saving during assembly

1. Mounting the adhesive foot
2. Hang in cover profile
3. Slide adapter pin onto hinge and secure. Done!

The adhesive base is fitted even faster and with greater precision using the intelligent positioning tool.

Planet
ASSA ABLOY

Three profile sizes, countless applications

With minimal planning effort for perfect hinge-side finger protection!

Planet finger protection cover profiles FSA 8800 [S] fit into almost all rebated and flush-fitting doors with Ø 18 – 22.5 mm roller hinges. Simply take measure of the diameter of the hinge roll to determine the appropriate cover profile, regardless of the type of hinge and the door.

Some typical uses

1. Aluminium system door with roller hinge

2. Wooden door flush-mounted

3. Wooden door rebated

4. Wood / aluminium door

Orders: order.planet@assaabloy.com | **Technical questions:** services.planet@assaabloy.com
The sets

Lengths and colours: FSA 8800 [S] complete sets are available in two versions: for securing **2 or 3 segments**. The profiles can be cut to the segment length. All parts required for installation are included in the sets.

The aluminium profiles are available in anodised or powder-coated finishes.
Of course, all RAL and various anodised colours are available on request.
Set for 2 segments
1755 mm (self-cut)

Securing of doors with 2 hinges
from the floor to the top hinge

Set for 3 segments
1980 mm (self-cut)

Securing doors with 2 hinges from
the floor to the upper edge of the door

Optional available:
Extension kit for
doors with an
additional hinge

Note: Bulk packaging, single parts and cut-to-size parts
are shown on page 8/9.

ASSA ABLOY

FSA 8800 [S] – the sets incl. mounting accessories

With the 2-part sets for securing the segment under the lower door hinge and between the lower and upper hinges, you receive a 1755 mm high cover profile for self-cutting.

With the 3-piece sets, the top segment of the door is also secured.
The included cover profile for self-cutting is 1980 mm high.

Both sets contain all required mounting accessories

FSA 8800 [S] – individual composition...

If the profiles are made to measure per metre, they are cut to the desired length. The matching mounting accessories can be put together individually.

In the 5-piece bundle version, you receive 5 profiles, each 2500 mm long, to cut to size yourself. Here, too, you can select the required mounting accessories yourself and order them separately - ideal for always having a suitable quantity of material in stock.
