

A little miracle
of technology -
advantages at a glance

Security cards are
used for verification
when re-ordering
keys and locking
cylinders.

- Sturdy and wear-resistant nickel silver key
- Comprehensive range of types for almost all applications
- High protection from common burglary methods
- Protected key profile with security card
- Upgrade with CLIQ technology possible
- Patent-protected thanks to innovative wedge groove
- Tested and certified safety according to EN 1303:2015
- The assignment of the keys can be identified with ten pins in different colours, which are available as an option. That makes it much easier to manage keys.

The ASSA ABLOY Group is a world market leader in access solutions. Every day we help people feel safer and more secure and experience a more open world.

Experience a safer
and more open world

Why carry a heavy bunch of keys? A single key for everything!

The model product range is as extensive as the wide variety of applications. This makes it possible to implement any application - from the front door to the drawer - in a building.

A double cylinder or a double cylinder with internal knob is the solution for the house or apartment door.

A half-cylinder secures the garage door.

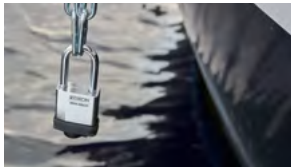

Padlocks are versatile and are also available with a protective cap.

The letterbox is secured with a locking lever cylinder.

Additional door locks require an external cylinder.

Increased protection against bump keys

Increased protection from drilling protection

Increased protection against manual manipulation

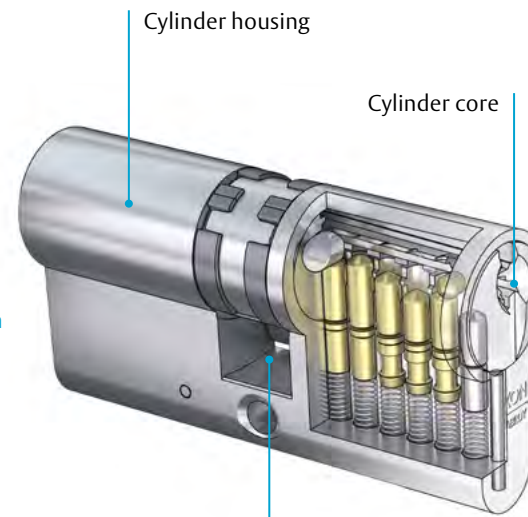

Increased protection against key copying

The better the locking cylinder – the more secure your door is

Burglars bring all kinds of tools to gain access. This usually involves attempts to pull out, break off, drill out or manipulate the locking cylinder with a lock picking tool.

They are missing only one thing: Time!

Because the more time passes, the higher the risk of being discovered. This is why it is worth protecting your building with high-quality SK6 locking cylinders.

Cam

Patented key profile with high picking security

Mechanical locking cylinders and locking systems of the IKON brand are thus future-proof solutions and definitely a good investment.

Vector rib of the IKON brand – a good investment in your security

Mechanical locking cylinders and locking systems from the IKON brand are characterised by reliable technology and proven durability. With the new high-quality and patented vector profile rib of the SK6 system, ASSA ABLOY offers a convenient solution. IKON locking cylinders offer optimum protection against common break-in techniques.

Whether for smaller or larger locking systems - wherever even greater flexibility and security are required, the Vector profile rib can be expanded into a mechatronic solution with CLIQ technology.
