Experience a safer and more open world

EN

Read this manual thoroughly before use and keep it in a safe place for later reference. The manual contains important information about the product, particularly for the intended use, safety, installation, use, maintenance and disposal.

Hand the manual over to the user after installation and pass the manual on to the purchaser together with the product if the product is sold.

A current version of these instructions is available online:

General description

Brief description

The *TSBC Web Control Panel* is a web-based application of *the TSB Controller* for monitoring and controlling escape doors and other devices in a building.

The signs and symbols in these operating instructions are designed to help you use the devices and instructions quickly and safely.

Meaning of the symbols

Danger!

Safety notice: Failure to observe these warnings will lead to death or serious injury.

Warning!

Safety notice: Failure to observe these warnings may lead to death or serious injury.

Caution!

Safety notice: Failure to observe these warnings may lead to injury.

Important!

Note: Failure to observe these warnings can lead to property damage and impair the function of the product.

Note!

Note: Additional information on operating the product.

Prerequisites

- Web browser (Windows® Internet Explorer version 7 or higher or other browsers such as Opera, Google Chrome, Safari or Mozilla Firefox) and JavaScript active.
  For optimal display, we recommend Mozilla Firefox.
- A license for the *TSBC Web Control Panel* is enabled in the FT Manager (see *FT Manager* D01254nn user manual).
- A panel and user have been created and configured in the FT Manager (see *FT Manager* D01254nn user manual).

Note!

Access can only take place from one computer at a time! The license is limited to one participant (1 IP address) per panel, i.e. an additional license is required for each additional access. The total number of licenses is limited to 5.

Calling up the TSBC Web Control Panel

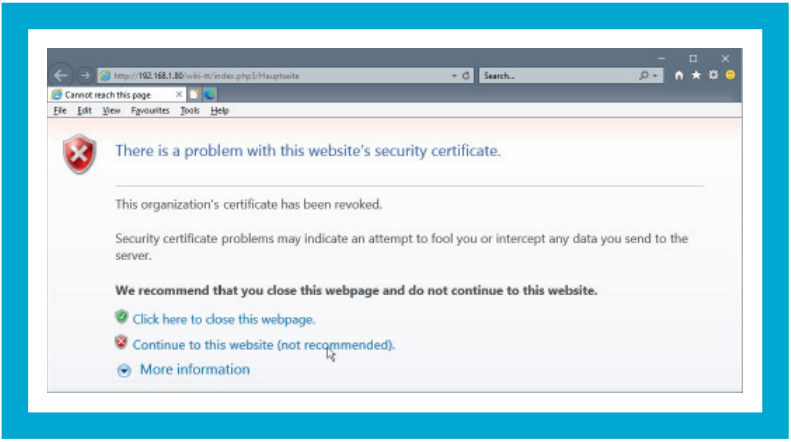
1 Start your web browser and enter the full URL of your previously created control panel in the address line (e.g.: https://192.168.110.1/tsbc_cp.klx?vt=1).

Note!

Contact your system administrator for the correct address.

If you are using Windows® Internet Explorer, the following security notice appears:

Fig. 1: Safety notice



Note!

The security certification encrypts communication between the computer and *TSBC Web Control Panel*. This security certificate is trustworthy but still unknown to Internet Explorer.

2 You will therefore need to select *Continue to load this website ....*

⇨ You have called up the *TSBC Web Control Panel*.

Menu interface

The system situation is displayed graphically according to the configuration in the FT Manager.

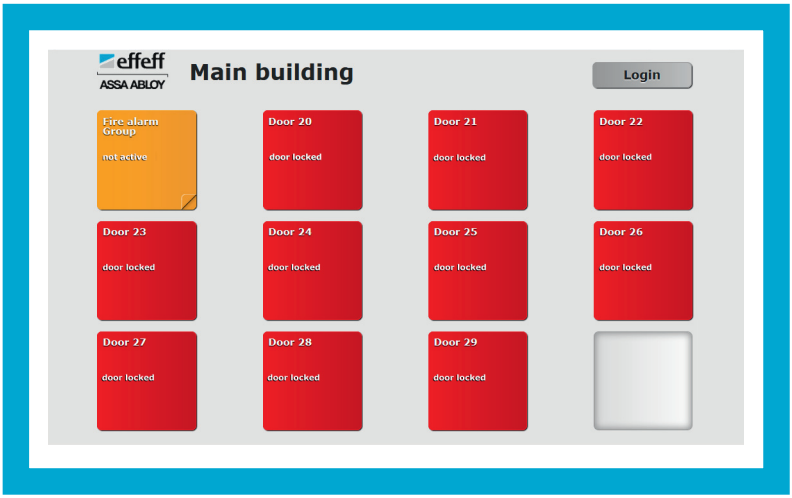


Fig. 2: Graphical representation of the system

Note!

All the system-specific data shown in the diagrams and images below serve as examples and are there to help you understand more easily.

1 Click on the login button to open the login screen.

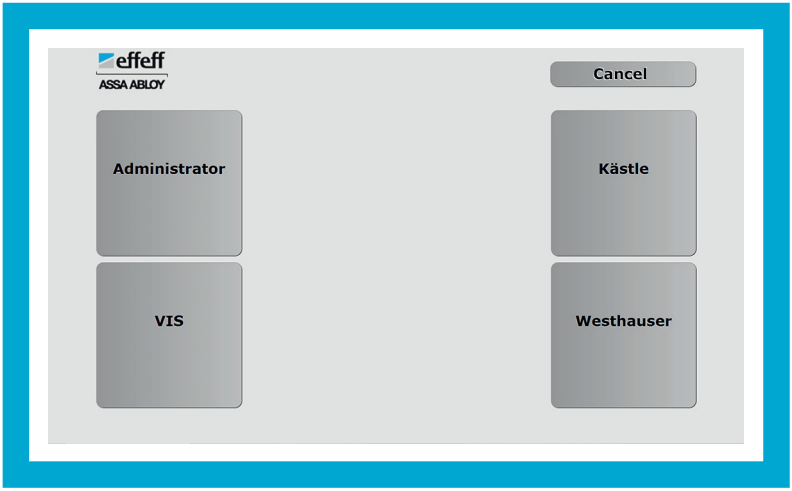

Fig. 3: Call up login screen

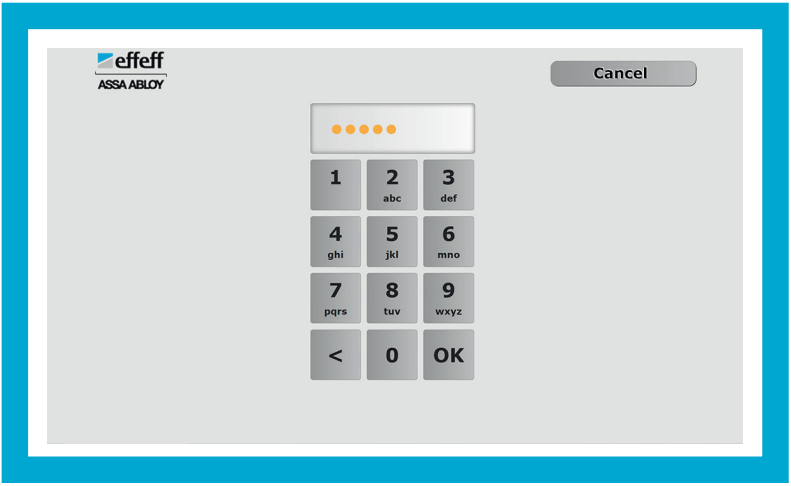
2 Make the login selection according to your access authorisation here:
- Administrator
  or
- VT (VT = Virtual control panel; example of a created user name)

Fig. 4:
Enter access code



3 Enter your access code and confirm with **OK**.

⇨ You have logged in to *the TSBC Web Control Panel*.

Note!

There is no feedback in the event of an incorrect entry. The **Logout** button at the top right indicates whether the login has been successfully completed.

Web Control Panel
home screen

By clicking on the individual symbols, you can now call up the assigned elements in order to carry out actions

Door elements

	· Door is locked · Element is permanently red · Operation is additionally blocked
	· Door is permanently accessible · Element is permanently green
	· Door is accessible once (temporary release) · Element flashes green and light green alternately
 	· Door is locked and in alarm state · Element flashes yellow and red alternately
	· Door is unlocked and in alarm state · Element flashes yellow and green alternately
	· Door is offline · Element is permanently grey **Note** If all buttons are greyed out, the connection to the TSB Controller is interrupted or it has failed.

Group elements

	· One-time switching group, without activity status · Element is permanently yellow
	· Group with activity status · Group is not active · Element is permanently yellow
	· Group with activity status · Group is active · Element is permanently blue
	· there is no function defined for the group · Element is permanently grey

Undefined elements

	· Element without groups/door assignment · Element is permanently white

Action elements

	· Locking the door
	· Continuous opening of door
	· Unlock door for one-time access (temporary release)
	· Reset alarm on door terminal
	· Activate group
	· Deactivate group

Note!

Special function: Delayed release after EMERGENCY-OPEN is activated. The delay time 2 cannot be activated from the TSBC Web Control Panel.

Die ASSA ABLOY Gruppe ist der Weltmarktführer in Zugangslösungen. Jeden Tag helfen wir Menschen sich sicherer und geborgener zu fühlen und eine offenere Welt zu erleben.
