

CLIQ® Go

Access control at your fingertips

IKON
ASSA ABLOY

IKON – The lock specialist since 1926!

Experience a safer
and more open world

Our invention and expertise –
IKON is the original and
has been shaping developments in lock and
security technology for over 90 years!

Since inventing and patenting the profile cylinder over 90 years ago, IKON locking cylinders have been setting standards in many countries throughout the world. When the patent was granted, it gave rise to the age of what is known as the security cylinder. This is a legacy which we are committed to and which we are proud of.

The profile locking cylinder is almost always used wherever doors are locked and need to be secured against unauthorised entry. Today, this cylinder represents the key component in lock and door security systems. We are still supplying keys and lock cylinders today for locking systems which were installed as far back as 90 years ago.

A man with dark hair, wearing a grey tweed jacket over a light blue button-down shirt, is looking down at a white smartphone he is holding in his hands. The background is a blurred outdoor setting with warm, golden light, suggesting late afternoon or early morning. In the top right corner, there is a blue circular graphic containing white text.

Anytime and anywhere

With the CLIQ Go app
you have control over your
electronic locking sys-
tem anytime and
anywhere.

Manage your security with the CLIQ® Go-App

Are you familiar with
the situation?

In an increasingly complex environment, management of a locking system should be intuitive and user-friendly. If security requirements continuously change, new employees require access, keys are lost or a service employee should only

have access on the weekend. The CLIQ® Go app adds a new dimension to security, because you can check and control access from your mobile device.

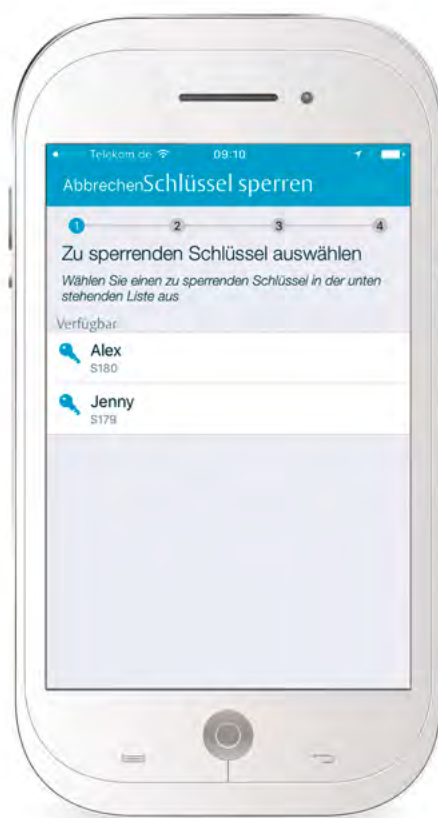

You plan who is permitted
to enter your premises

If you want to expand
your locking system,
it is not a problem

If a key is lost, you can prepare to
block it with the CLIQ Go app

In a fast-paced world, you need
flexible access solutions so that you
can concentrate on your goals

CLIQ® Go brings the access solution
to the cloud so that you can
manage your locking system
anytime and anywhere

Now with Connect App and
CLIQ® Connect key for
direct programming
via Bluetooth

CLIQ® Go – the system for electronic locking

Long-lasting, secure and efficient

CLIQ® Go is a cloud-based system with an app and operates with Android and iOS tablets, smartphones and Windows PCs.

CLIQ® Go is a purely electronic locking system based on the precision mechanical components and microelectronic modules of the CLIQ® technology from ASSA ABLOY. The microelectronics in the programmable, waterproof key and the compact electronic locking cylinder guarantee maximum security – reliably and without complications. CLIQ® Go solves the problem of lost keys. Because every key is individually programmable, locking rights can be deleted easily – no matter where you are.

The cloud-based system works seamlessly via the CLIQ® Go app. An authorised specialist dealer can also manage the locking system for you.

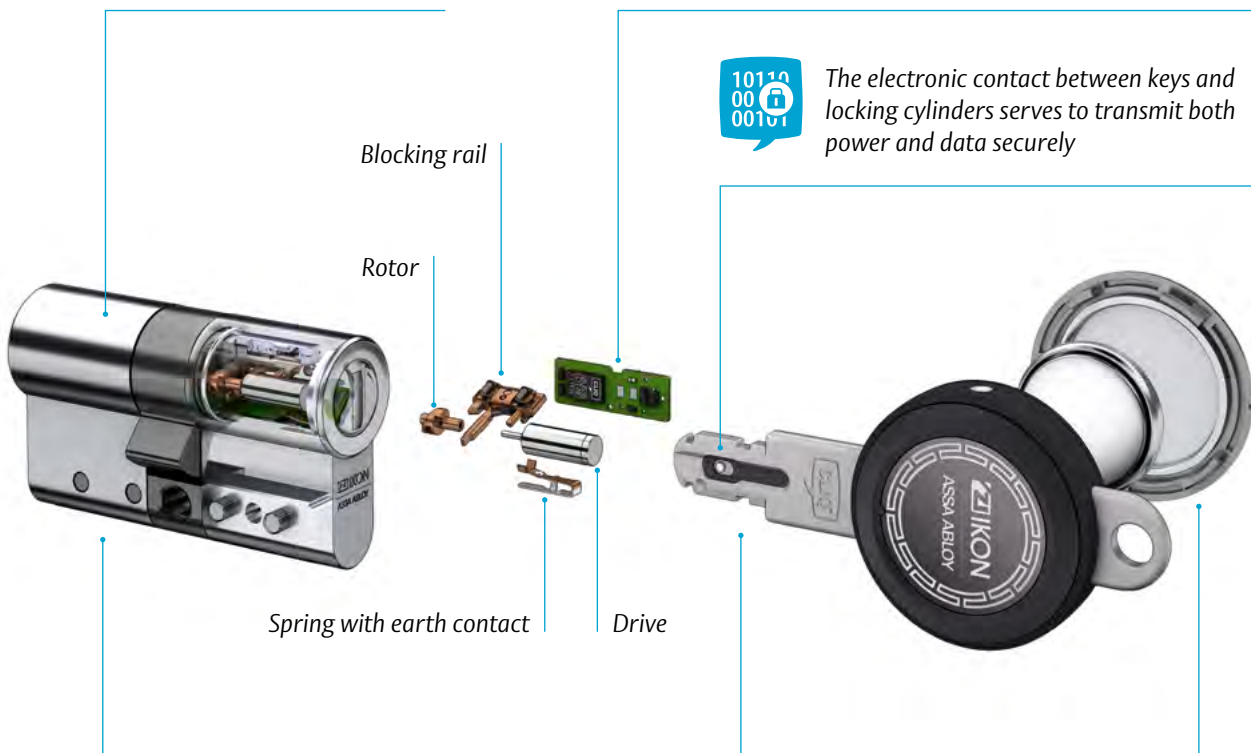

Simpler and quicker installation of cylinders without wiring

New, future-oriented CLIQ® chip generation with AES encryption and fast processing speed with efficient energy management

The electronic contact between keys and locking cylinders serves to transmit both power and data securely

Keys and cylinders can be programmed with flexible locking authorisations and schedules

Waterproof and dust-proof key head with battery and electronic board

Rapid replacement of the standard battery in the key – without the use of tools

A variety of potential uses. – offers full flexibility

High-security CLIQ® cylinders for all door types, batter in the key, minimal maintenance, no wiring, long service life.

Compact CLIQ®Go locking cylinders offer very high security. Thanks to the large selection of different types of cylinders, the system is suitable for a variety of applications – from your entrance door to the securing of alarm systems, doors and cabinets.

With comprehensive certification for a variety of applications, including outdoor installation, you are outstandingly equipped for all current and future requirements.

Programming devices for the updating of keys are available as tabletop and mobile units. With the Connect App and a CLIQ® Connect key, direct programming is possible via Bluetooth.

The right cylinder type for every application

*You secure your entrance
door with a double cylinder*

*You secure your alarm sys-
tem with a half-cylinder*

*You secure the letterbox with a
locking lever cylinder*

*You secure desk drawers with
a furniture cylinder*

*You secure cabinet doors
with a furniture olive*

*You secure basement
rooms with a padlock*

Access requirements can
change very quickly and
you must react to them.

With CLIQ® Go the
locking system can be
managed flexibly.

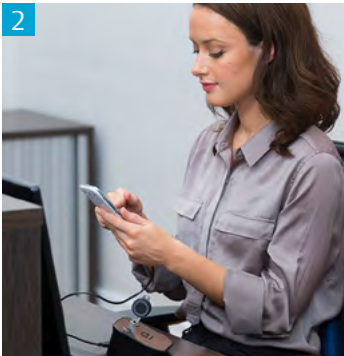

Lost keys – simply program them out with the CLIQ® Go app

Example

Lost keys can be a serious security risk. With CLIQ® Go you can withdraw access entitlements anytime and anywhere.

1 Your employee at the reception desk notifies you about a lost key.

2 You block the lost key with the CLIQ® Go app.

3 Then you program a key and use it to withdraw the access entitlements at the relevant doors.

CLIQ® Go app

Cloud-based CLIQ® Go

Manage your system with the CLIQ® Go app

- Select the user key
- Withdraw access entitlements for the lost key and create a new key with entitlements (e.g. schedule and door) or change the access entitlements for an available key
- Optional: Program the key directly with the programming device while on the move or use the Connect App and a CLIQ® Connect key

Grant access to a room easily with the CLIQ® Go app

Example

Access requirements can change very quickly and you must react to them. With CLIQ® Go you can manage access in real time.

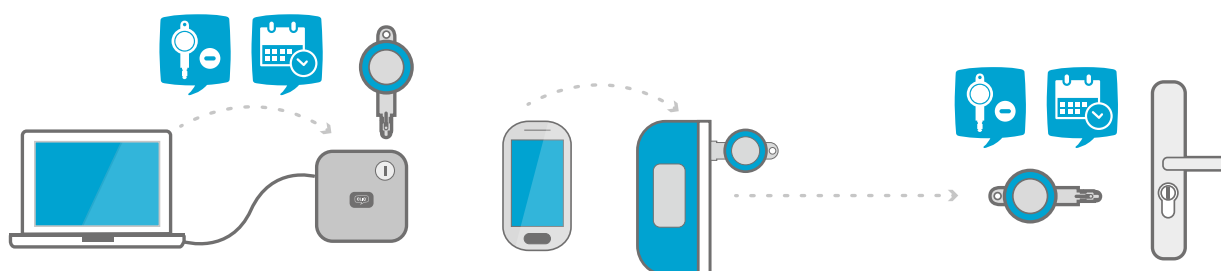

Previously, your assistant did not have access entitlement to a room. This was not programmed into her key. She calls you and asks you to issue an authorisation.

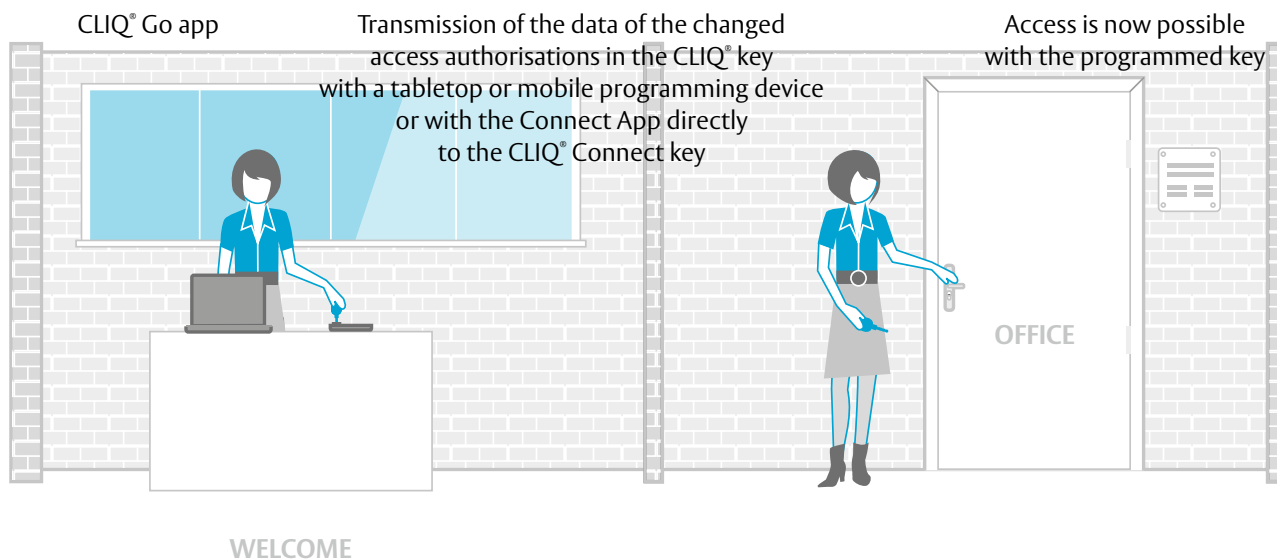

You inform your colleague at the reception desk who changes the access entitlements easily and quickly with the CLIQ® Go app.

The colleague at the reception desk goes to your assistant with a mobile unit and programs the key on site. Now your assistant can now unlock the room.

or

CLIQ® Go is the future-oriented solution for small companies and private users – your specialist retailer will gladly offer you guidance!

Always on hand:

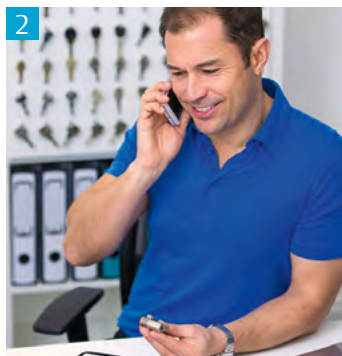

With CLIQ® Go you save time and money

Example

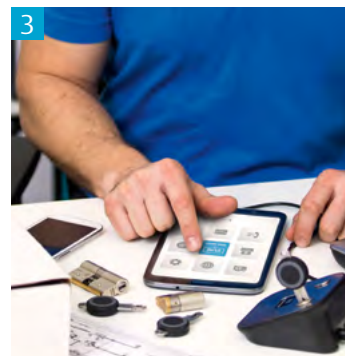

If your company changes, you must be able to rely on the flexibility of your locking system.

You can obtain new keys and cylinders from your security specialty shop. These new components can be delivered very quickly...

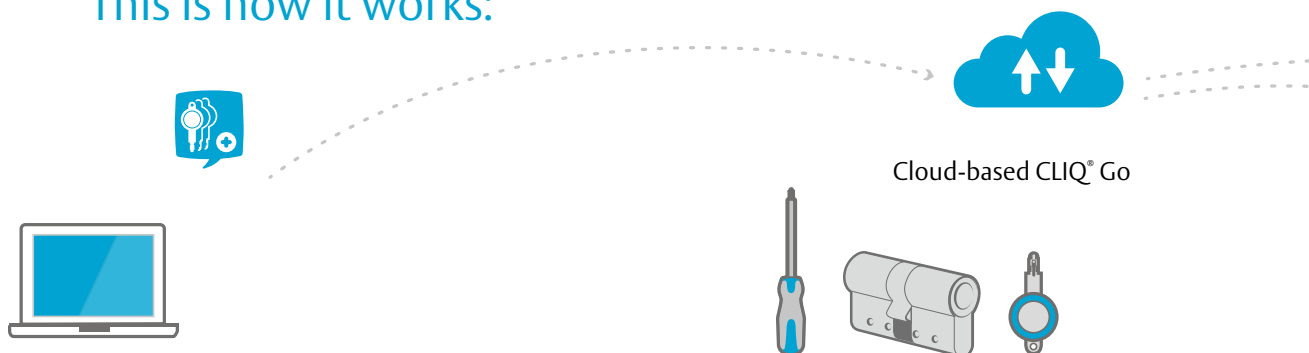

... because it is an electronic locking system. Your specialist dealer stocks all the necessary components for you. They only need your personal security authorisation.

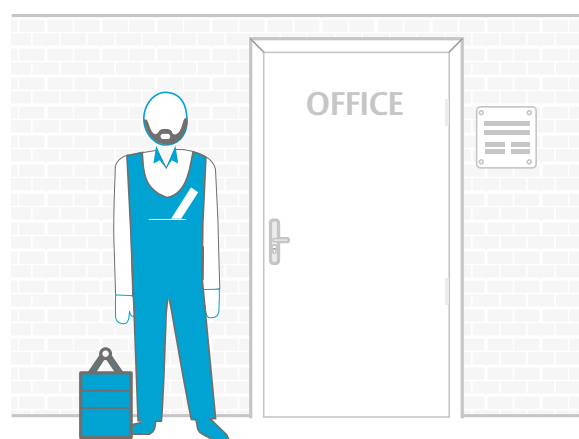

They program new cylinders and keys in their specialty shop. You can already see the updates with the CLIQ® Go app!

This is how it works:

Your specialist dealer combines CLIQ® keys and cylinders and expands your system in the cloud.

Your specialist dealer installs the CLIQ® components in the doors

Installation takes place quickly and easily – this quickly makes your new rooms usable and secure.

Your specialist dealer can supply you on short notice and install the new cylinders in your doors.

CLIQ® Go cylinders can be installed easily without wiring in the door and can even be adapted on site to different door leaf thicknesses.

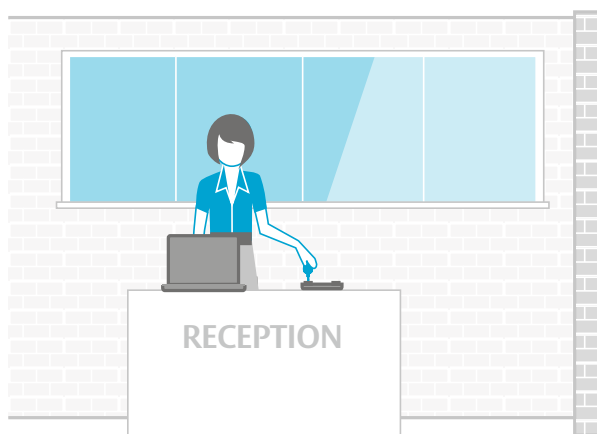

You can follow the progress of the expansion at anytime via the CLIQ® Go app and immediately manage the new components of your locking system in your app after installation.

Automatic updating of new keys and cylinders in your CLIQ® Go PC application

Automatic updating of new keys and cylinders in the CLIQ® Go app
